Example Worksheet: The Kitchen Sink

Slides

Iliad Intensive

October 15, 2026

What this deck demonstrates

- A `slides.tex` in a worksheet folder is compiled to `slides.pdf` by the build.
- The page shows a *Slides* row: present, handout, and the LaTeX source.
- This bullet arrives on a `\pause` — two slides in the presentation build, one in the handout.
- Math renders as usual: $H(p) = -\sum_{x} p(x) \log p(x)$.

That's it

Edit `slides.tex`, rebuild, refresh.
